INTRACO Prime with BREEAM Excellent certificate at “Final” stage

czwartek, Lipiec 7, 2022 - 11:50

The INTRACO Prime building has strengthened its position in the area of sustainable construction. The facility, with a score of 80.4%, received a BREEAM A certificate at the Excellent level. This means an increase in the certification score obtained at the design stage. In two categories, i.e. for transportation and water management, the building received the maximum score of 100%, and for ecological solutions - 90%.

INTRACO Prime is a state-of-the-art A-class office building with an area of ca. 13,000 sq. m. The occupancy permit for the building was issued in March. The handover of the space to the first tenants is scheduled for the third quarter of 2022. The project was carried out according to the very strict requirements of BREEAM environmental certification.

The BREEAM Excellent level means the fulfillment of over 70% of all certification requirements and sums up the excellent quality of the building  design solutions and workmanship. Many of the materials used during the construction of INTRACO Prime were sustainably sourced, i.e. had EPD environmental declarations or ISO-standard environmental certifications (e.g. concrete, facade glass and mineral wool). The waste generated during construction was properly planned and monitored, so that more than 97% of the waste did not end up in a landfill, but was recycled. The finished building will feature a full range of energy- and water-saving solutions.

 recently celebrated the issuance of an occupancy permit, and today we can confirm our success in the field of BREEAM environmental certification as well. The construction of INTRACO Prime was a  investment A⁺. That is why, from the very beginning, it was part of the city  strategy of responsible land use. The number of A solutions, as well as the way the construction process was

carried out, paid off in the form of a high certification level. I believe that our next investments will also be built in the spirit of sustainable development, said **Tomasz Sztonyk**, Member of the Board of Polski Holding Nieruchomości.

□□ are pleased to have met the challenge of raising the certification level from Very Good at the design stage to Excellent at the as-built stage. The building incorporates a number of amenities that increase the comfort of use and cost-effectiveness and also minimize the negative impact on the environment. Modern building systems for measuring utility consumption and controlling the lighting, secure bicycle parking spaces and chargers for electric cars are just a few of them. During the BREEAM certification process, it was also extremely important for the general contractor to carry out the work properly, organize the construction in an exemplary manner, use materials from sustainable sources and minimize the production of construction waste, said **Błażej Szymczyński**, Associate Director, JW+A – BREEAM assessor of INTRACO Prime.

About INTRACO Prime

INTRACO Prime is a state-of-the-art, A-class office and commercial complex with an area of ca. 13,000 sq. m. Its construction began in April 2020 and the occupancy permit was issued in March 2022. Excellent location in a short distance from the Dworzec Gdański metro station and Old Town, accessibility and functional spatial layout are just a few of its assets. Polski Holding Nieruchomości is the investor of INTRACO Prime. The project has been executed by STRABAG Sp. z o.o. and designed by a consortium of design studios, Juvenes-Projekt Sp. z o.o. and Pracownia Obsługi Inwestorów Pro-Invest Sp. z o.o. JW+A was responsible for the building's environmental certification process.

Polski Holding Nieruchomości Group

Polski Holding Nieruchomości (PHN) is one of the largest groups in the Polish commercial property sector in terms of the market value of its portfolio. The Group □□ portfolio comprises over 150 real estate assets with a market value of

approx. PLN 3.4 billion. PHN's operations are concentrated in Warsaw and Poland's major regional cities, including Poznań, Łódź, Katowice, Cracow, Wrocław, and the Tri-City area. The company has many years of expertise in the following sectors: office, commerce and logistics, in both real estate management and investment project implementation. PHN has been listed on the Warsaw Stock Exchange since February 13, 2013.

STRABAG

STRABAG SE is a European-based technology partner for construction services, a leader in innovation and financial strength. STRABAG's business spans all areas of the construction industry, bringing together skilled engineers, high quality construction materials and state-of-the-art machinery to execute complex construction projects on schedule, of the highest quality and at the best price. STRABAG uses a whole range of services offered by specialized group companies which assume responsibility for execution, adding value to their Customers. With almost 75,000 employees, STRABAG SE generates approx. EUR 16 billion in annual revenue. Its operations reach far beyond the borders of Austria and Germany. Through a network of subsidiaries, STRABAG SE is present in many European markets and is gaining a foothold on other continents. STRABAG Group has been present in Poland since 1987. It has more than 6,500 employees and its annual revenue exceeds PLN 7.5 billion.
